HOLLY LINERS

Angelica Nurseries

growers of fine plants

R. D. #1

Mohnton, Pa.

MEMBER . . .

American Association of Nurserymen
Pennsylvania Nurserymen's Association
Holly Society of America
American Rhododendron Society

All plants listed are cutting grown out of 3" clay pots. Height may range from five to twelve inches depending on variety. Plants are well-rooted, many pot bound and most varieties have made one growth, which is hardened off. Hollies are ready and shipped about the first of May in specially made lightweight cartons which hold a minimum of 50 plants.

OPACA—AMERICAN HOLLY

Our Own Introductions:

NEW! Our new introductions. You've liked our Angelica, Greta and Male Aquapaca and received them warmly as outstanding hollies. Your many letters of praise for these varieties has been most gratifying indeed. Now, for the first time we can offer two NEW holly varieties of outstanding merit which we are sure you will also find outstanding. Stock is very limited so place orders early.

90c each—85c each per 10

➤ **EXOTIC**—A medium growing holly with heavy textured, dark green, medium size twisted leaves. Berries are good size, round and of good color. One of the finest we've seen for its extremely attractive foliage and habit.

➤ **HOLIDAY**—The finest holly we have observed, possessing more of all the desirable qualities than any other variety. A slow-growing, compact pyramidal type with heavy medium-sized dark green foliage; leaves slightly spiraled. A profusion of large, bright red berries borne in clusters. Berries are round, but flat at stem and apex, much like miniature pumpkins.

50c each per 100 (25 or more)

ANGELICA—Good fast growing, well branched pyramidal type. Large leaves and large red berries. A real money maker.

GRETA—Slow growing pyramidal type, with medium sized, dark green evenly spined leaves and dark red berries. Greta holds berries longer than any other variety and it is not unusual to find red berries the year round; with the preceding year's fruit still intact while current crop is ripening.

➤ **MALE AQUAPACA**—We consider this one of the most attractive of any male holly—good pyramidal type with sharply toothed and twisted leaves giving it the appearance of English holly. Prolific blooming even in small plants. An unusually attractive male holly and an excellent pollinator.

GROUP I

45c each per 100 (25 or more)

- ARDEN**—Horizontal branches showing orange-red berries.
- CLARK**—Lustrous green leaves, deeply toothed. Bright red berries.
- FARAGE**—Deep green leaves, quite long. Red berries.
- FEMALE**—Medium evenly spined foliage. Red berries.
- GUNBY**—Evenly toothed dark green leaves. Red fruit.
- **HARRISBURGER**—Narrow evenly spined leaf. Very bright red berry.
- **JOHNSON**—Fine pyramidal. Medium leaf and good red fruit. *discre.*
- JOYCE**—Dark green glossy leaves, evenly toothed. Bright red fruit.
- MALE**—Select good pollinators.
- MANIG**—Dark green evenly spined leaves. Bright red fruit.
- MISS HELEN**—Good grower with spiny leaf. Large red berry.
- PARKTON**—Rapid growing large leaf variety. Dark red berry.
- PYRAMIDALIS**—Pyramidal form. Spined foliage. Red fruit.
- ROTUNDIFOLIA**—Quite round well spined leaves. Good red fruit.
- SARAH HIGGINS**—Medium size spined leaves. Red berries.
- **WALTERMEYER COMPACTA**—Pyramidal type, spiny leaves. Red fruit.
- **YELLOW BERRY**—Pyramidal type, best type foliage and clear yellow berries.

GROUP II

50c each per 100 (25 or more)

Order early to assure best selection of varieties. We grow on order for many of our customers who place orders during the early summer for their following spring requirements.

Two to four-year named varieties of holly are also available out of 4 to 6" pots, although not every size in every variety. These are listed in our catalogue of general stock along with field grown American and English hollies from 2 to 8 ft.

TERMS:

Prices, net, f.o.b. nursery.

Deposit required on all orders.

1/3 down payment required on c.o.d. orders.

Payment in full with order—free packing.

Shipping at cost and risk of purchaser.

Minimum order—50 plants.

Minimum order per variety—25 plants unless otherwise stated.
